## Step 1

### surfaceclean™

#### Cleaner / Disinfectant

*A ready-to-use cleaner disinfectant that eliminates 99.9% of bacteria, viruses, germs and illness-causing microorganisms like staph/MRSA.*

#### DIRECTIONS FOR USE:

- Place trigger sprayer into SurfaceClean bottle.
- Surface must be clean and free of dirt and grime.
- Hold container 6-8 inches away from surface. Spray area until it is uniformly covered with the solution. Allow product to coat the surface and remain wet for 3-5 minutes. Clean surface with a clean cloth or sponge.
- Use SurfaceClean on a regular basis to clean surfaces treated with SurfaceAide XL.

## Step 2

### surfaceaide™ XL

#### 24/7 Antimicrobial Protection for all Surfaces

*For all surfaces and equipment. One application inhibits the growth of bacteria, mold and fungi on any surface 24/7 for up to 90 days.*

#### DIRECTIONS FOR USE:

- Place trigger sprayer into SurfaceAide XL bottle.
- Before applying SurfaceAide XL, it is important to clean and disinfect with SurfaceClean.
- Spray entire area 4-6 inches from the surface making sure the surface is uniformly covered. Let stand until dry or 3 minutes and wipe dry with cloth or sponge.
- If spotting occurs, wipe with moist cloth or sponge. Test for staining and color-fastness of fabrics and carpets by treating and drying a small, concealed area prior to application.
- Dry carpet areas and surfaces before re-entry and dry articles before use.
- Refer to bottle label for dipping/soaking application.

## **fabricaide®**

### **24/7 Antimicrobial Protection for Fabrics**

*One application provides 24/7 antimicrobial protection that proactively inhibits the growth of bacteria, mold and fungi for up to 90 days.*

#### **DIRECTIONS FOR USE:**

##### ***Preparation:***

- Garments must be clean prior to application. If dirty, wash them prior to antimicrobial treatment.
- Application of FabricAide must be done separately from normal washing. Do not mix with regular detergent.

##### ***Application:***

- For a typical wash load, pour 4 oz. of FabricAide into final rinse water of the washing cycle. Do not use in conjunction with any other laundry products.
- For front loaders, pour into dispenser for final rinse cycle.
- Dry garments as usual.

*Swiftly eliminate illness-causing microorganisms and defend against future growth for months with this powerful trio of products. Designed to deliver the worlds most advanced long-lasting protection against bacteria and germs, the Bac-D Kit offers an effective and proven way to proactively reduce microbe growth in medical, athletic, home and facility environments. You're only as strong as your best defense ... the Bac-D Kit is your solution to providing constant protection for all the fabrics and surfaces that touch your life.*
