and Superbugs?**

HIBICLENS® & HIBISTAT®
Antiseptic Antimicrobial Skin Cleanser

**THERE'S ONE
SPORTS RISK
YOUR KIDS
DON'T NEED
TO TAKE**

**HIBICLENS®
& HIBISTAT®**
ANTISEPTIC ANTIMICROBIAL SKIN CLEANSER

IN SPORTS body contact or equipment sharing are common causes of staph cross-infections that can be passed on to other team members. HIBICLENS® the antimicrobial, antiseptic skin cleanser can be part of an effective defense for preventing the spread of MRSA. Its active ingredient works in a unique way — it kills germs on contact and bonds to the skin to keep killing microorganisms **up to 6 hours** after washing. HIBICLENS® has been proven to kill MRSA (in vitro) and other staph infections. The same ingredient is available in convenient HIBISTAT® towelettes.

Part of an effective defense for:

- PARENTS
- ATHLETES
- SCHOOLS
- CORRECTIONAL FACILITIES
- EMS / FIRE
- HEALTHCARE
